

3/18/99

RADAC meeting

10:00-11:30

I. System Engineering Process

- The requirements team will meet 3/23-3/25 in the E-107, 2<sup>nd</sup> floor, Range Safety Conference Room

II. Funding

- Jay spoke about funding to ensure the team that funding will be available for this project

III. Demo

- The team evaluated the Command and Control Technologies Corporation demo held 3/15/999
- The following lists of were developed:

Questions/concerns

Demo covered only single tracker  
Setup?  
Archival  
How is playback implemented  
Will it handle our mix of vehicles?  
Filter (smoothing) not editing  
Target selection  
Do they have any competitors?  
STI  
Cost  
Schedule  
Scripting person  
UDCR - how  
Source code or not  
3<sup>rd</sup> party upgrades

Good Points

Internet capability same code local & remote  
Corporate knowledge  
Have investigated 3<sup>rd</sup> party software  
Probably suitable for large ELV

- Should another demo be arranged? If so, we should set agenda and include the following:  
Set-up from 0 to launch  
Simulated with RADAC  
Multiple trackers  
3<sup>rd</sup> party objects  
CM  
Archival/retrieval

IV. Comments

- **Next meeting** - 4/1/99
